

Mint of the United States at Philadelphia,

MELTING AND REFINING DEPARTMENT,

Philadelphia, 28th Aug. —, 1882.

Sir,

J. T. Kulp was appointed as a workman in my Department, and assigned to the position of Melter. He has been occasionally employed in that capacity, but I regret to say that his lack of care in melting and pouring metal, has prevented my employing him in that position, except in case of extreme need, and then only on base metal. I respectfully suggest that he be made a helper, at a wage of \$2⁹⁰ per day. He is otherwise a good man, but we need another melter on occasion, and there is one or more ready to take a Melter's place.

Very Respectfully
J. C. BoothHon. A. London Snowden,
Superintendent.
